Transit time to Jeddah from various origin

Origin	Transit Time to Jeddah Islamic Port	Transit time to Jebel Ali
Izmir	6 days	16 days
Mersin	6 days	14 days
Istanbul	10 days	21 days
Southampton	18 days	24 days
Barcelona	10 days	21 days
Genoa	10 days	22 days
Le harve	15 days	25 days
Athens	6 days	16 days
USA	21 days	28 days
Toronto	20 days	25 days

The strategic location of Jeddah Islamic Port in connecting East and West can be easily identified from the above map. The transit time from West to Jeddah Islamic Port is much lower when comparing it with any GCC ports. For GCC countries such as Qatar and Kuwait containers are transhipped via Jebel Ali which increases over all transit time. We can also handle transit shipment to Iraq by land transport via Kuwait.

MIDDLE EAST

Jeddah is the first calling port

for ALL MOTHER vessels passing through Red Sea

Benefits

Benefits of Transit Via Jeddah Islamic Port (For Qatar and Kuwait Shipments)

1. Transit time to Jeddah Islamic Port is the lowest for shipments from western countries (Europe, Canada, U.S. North Africa, etc.) when comparing with GCC countries. Jeddah Islamic port is also the first calling major port in GCC for vessels passing through Suez Canal & Red Sea en route to East.
2. Due to the political issues in Syria, it is also disturbed / affected the trucking service from Turkey to Qatar and Kuwait. These can be transhipped via Jeddah Islamic Port for reducing the transit time.
3. Saudi Arabia share the borders with all GCC countries (UAE, Bahrain, Oman, Kuwait, Qatar) and all are within a distance of 2 - 3 days transit time from Jeddah port on the road. Among above GCC countries, the ocean shipments to Kuwait & Qatar are normally transhipped through Jebel Ali using feeder vessels which makes a long transit time from western part of the world to these countries. While making a transit through Jeddah port to these countries the transit time can be reduced tremendously. By the time a vessel reach Jebel Ali, the goods can be reached to the door of consignee if routed via Jeddah port.

Benefits

4. The shipments goes to Southern part of Iraq can be transhipped through Jeddah in transit via Kuwait more faster than via land route of Jebel Ali / Kuwait when the goods originate from west. While routing through Jebel Ali, it needs to cross 3 borders i.e. UAE, Saudi Arabia & Kuwait. While through Jeddah port, it is Saudi Arabia & Kuwait only. Moreover, through Jebel Ali it needs to deposit the customs duty to make the transit, with us we don't need to pay duty on deposit.
5. The total transit time from origin countries in the west to Qatar/Kuwait is very much less when comparing direct services to these destinations or via Jebel Ali
6. More frequency of vessel to Jeddah seaport.
7. Shipping lines serve Qatar and Kuwait via Feeder vessel and in most cases there are more than one transshipment ports. Direct service to these destinations are seldom

OPERATION TIMINGS FROM JEDDAH

5 - 6 Working days from Jeddah Islamic Port for Qatar as from obtaining the delivery order from shipping line.

6 - 7 Working days from Jeddah Islamic Port for Kuwait as from obtaining the delivery order from shipping line.

The transit time may vary from carrier to carrier and port to port.
